- Self-managing in a remote work environment.
- Efficient work-flow.

Recent Projects

- **Portfolio**   http://us-01.kenticolab.com/Web073517/home.aspx
  - Developed an example portfolio utilizing the Kentico CMS system for easy maintainability and expansion based on a pre-written theme.
- **Fotah**   www.misterhamm.com/fotah
  - Instagram search engine written entirely in AngularJS. Features the ability to search any hash tag on Instagram. Alerts are managed via ngMessages and results are animated via ngAnimate.
- **MadLib App**   www.misterhamm.com/madlibs
  - Fun exercise in data binding in AngularJS. This app is easily expandable to include multiple MadLib stories. All fields are fully form validated with a reset functionality built in.
- **List Minder**   www.misterhamm.com/list_minder
  - Written as a jQuery exercise, this app allows the user to add items to a shopping list, mark off items that have been found, and clear the entire list once the shopping has been done.
- **Video Game Search**   www.misterhamm.com/twitcheye
  - This app utilizes Giant Bomb's API to search through any of the video games maintained within their database. It also integrates the Twitch API to provide easy access to view live streams for any game.
- **Star Trek Quiz**   www.misterhamm.com/quiz
  - Written with jQuery this app is a take on the popularity of quiz apps in social media. It features the logging of user input to provide feedback on scoring and rank at the end of the quiz.
- **Waitstaff Calculator**   www.misterhamm.com/waitstaff_calc
  - The app takes input from the user on meal price, tax, and tip and calculates the diner's final price as well as logs the waiter's total number of tables served, total tips, and average tip per table for the session. Built with AngularJS.

Job Experience

ACE Bakery

- ACE Bakery is a $120MM artisan bread company with a full line of both foodservice and retail breads and rolls.
